@: hello@alexburgos.dev

www: <https://alexburgos.dev>

Front End Engineer with 10+ years of experience building web applications and products at scale. Experienced with React/Typescript stacks, with an interest in agentic and creative coding. Seeking a a senior product engineering role in Barcelona, open to remote positions.

SKILLS

React · Next.js · TanStack · TypeScript · Redux · Svelte · Cypress/Playwright · CSS/Tailwind · Vite/Turbopack · Bun/PNPM · Cloudflare/Netlify · GCP/AWS/S3 · CI/CD · TurboRepo

EXPERIENCE

Kiwi.com — *Senior Software Engineer* Barcelona · 2022 – 2026

- Led our team stack migration (Next.js/React) to a monorepo: modernizing our stack, improving performance and aligning with core product initiatives. Switched to Turbopack and PNPM with modern Next to improve install and build times.
- Refactored our client side auth service so that we could consume new endpoints and oAuth services. Shipped a new UI with more secure password-less login options. Alongside other customer centric features.
- Improved app performance and rendering by up to 2x, measured through DataDog, by refactoring our data fetching patterns, and leveraging tree shaking and code splitting across our code.

Smarty Oy — *Senior Software Engineer* Helsinki · 2020 – 2022

- Built features using React/Redux for an ad-campaign video editor, owning delivery from design handoff to production.
- Mentored junior engineers through structured knowledge-sharing sessions covering shared services and architecture.
- Expanded the design system component library and drove measurable improvements to app performance and test coverage, addressing some bottlenecks we noticed with web vitals.

Schibsted Media — *Software Engineer* Stockholm · 2020

- Improved the Aftonbladet news platform working alongside designers — resolved accessibility issues and raised reliability using a stack consisting of React, an in-house CMS platform, and a Node client.

Food52 — *Software Engineer* New York · 2017 – 2019

- Delivered new UI features and e-commerce tooling, migrating the front end from Knockout.js to React/Redux.
- Re-engineered the cart and checkout flow for mobile, integrating a third-party payment gateway and improving mobile conversion.

Wyng — *Front End Developer* New York · 2015 – 2017

- Produced micro-sites, email templates, and interactive digital experiences powered by user-generated content.

EDUCATION

Binghamton University, New York 2013

B.S. Computer Engineering

VOLUNTEERING

MigraCode — *Mentor & Code Buddy* Barcelona · Ongoing

Mentor and code buddy at MigraCode, a non-profit helping immigrants and refugees learn web development and computer science fundamentals.
